

The virus is still making

&

people sick and we need

to be safe.

Your staff person wants

to make sure that you

don't get sick. Some

people are still getting

sick.

Your

staff

will be

wearing

some

new

items

to keep

you

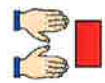

safe

so

you

don't

get

sick.

They

are

going

to start

wearing

face

masks,

gowns,

gloves

&

and

face

shields

or

goggles.

This

is all

so you

don't

get

sick.

You

shouldn't be afraid

or

worried.

They are still

your

staff

&

and

will be with

you

just as they

were but

they

look

a little

different

now.

Listen closely, you can still

hear their voices and see

&

their eyes. They are still

the same person that

cares about you.

Remember it is like they

are wearing a costume

but it is one that will

1

protect

you

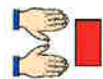

so

you

don't

get

sick.
