

The virus is still making

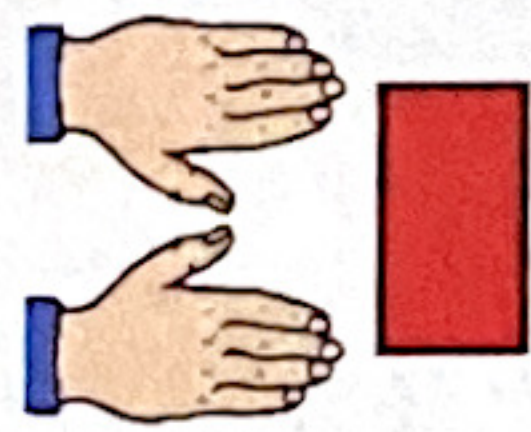

people sick.

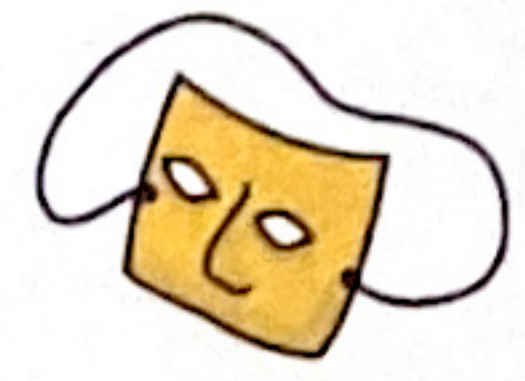

Your staff person wants

to make sure that you don't

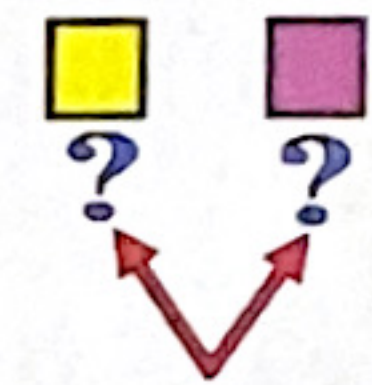

get sick. They are going

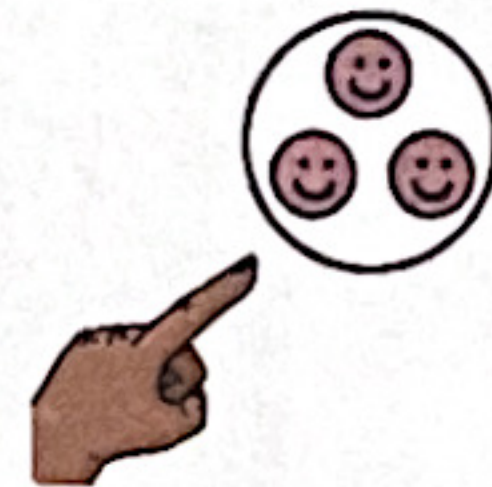

to start wearing face masks

when at work with you.

You shouldn't be afraid or

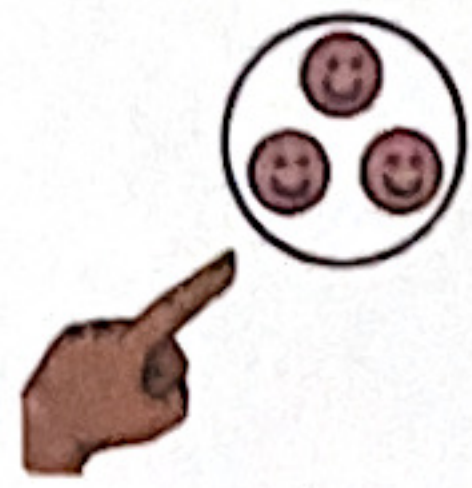

worried. They are still your

&

staff and will be with you

 just as they were but they

 look a little different now.

 You can still hear their

 & see their eyes.

 Remember they are wearing

the face masks so that you

do not get sick.
